

Tachyon Protocol

Internet Libre

The Decentralized Internet Protocol Brings Next-Gen VPN based on Tech Trusted by 50 Million Users

What is Tachyon Protocol?

Tachyon Protocol is a decentralized internet protocol that aims to create a Libre, Secure and Private Internet for you. Based on Tachyon Protocol, the Next-Gen VPN, IoT, DeFi, Storage, CDN, DNS and other Apps will benefit 900 million users at least.

Powered by V SYSTEMS & X-VPN

Top 55 on Coinmarketcap
World's top 5 staking coin by Staked.us

50,000,000 global users
2,500,000 downloads per month

Why do you need Tachyon Protocol?

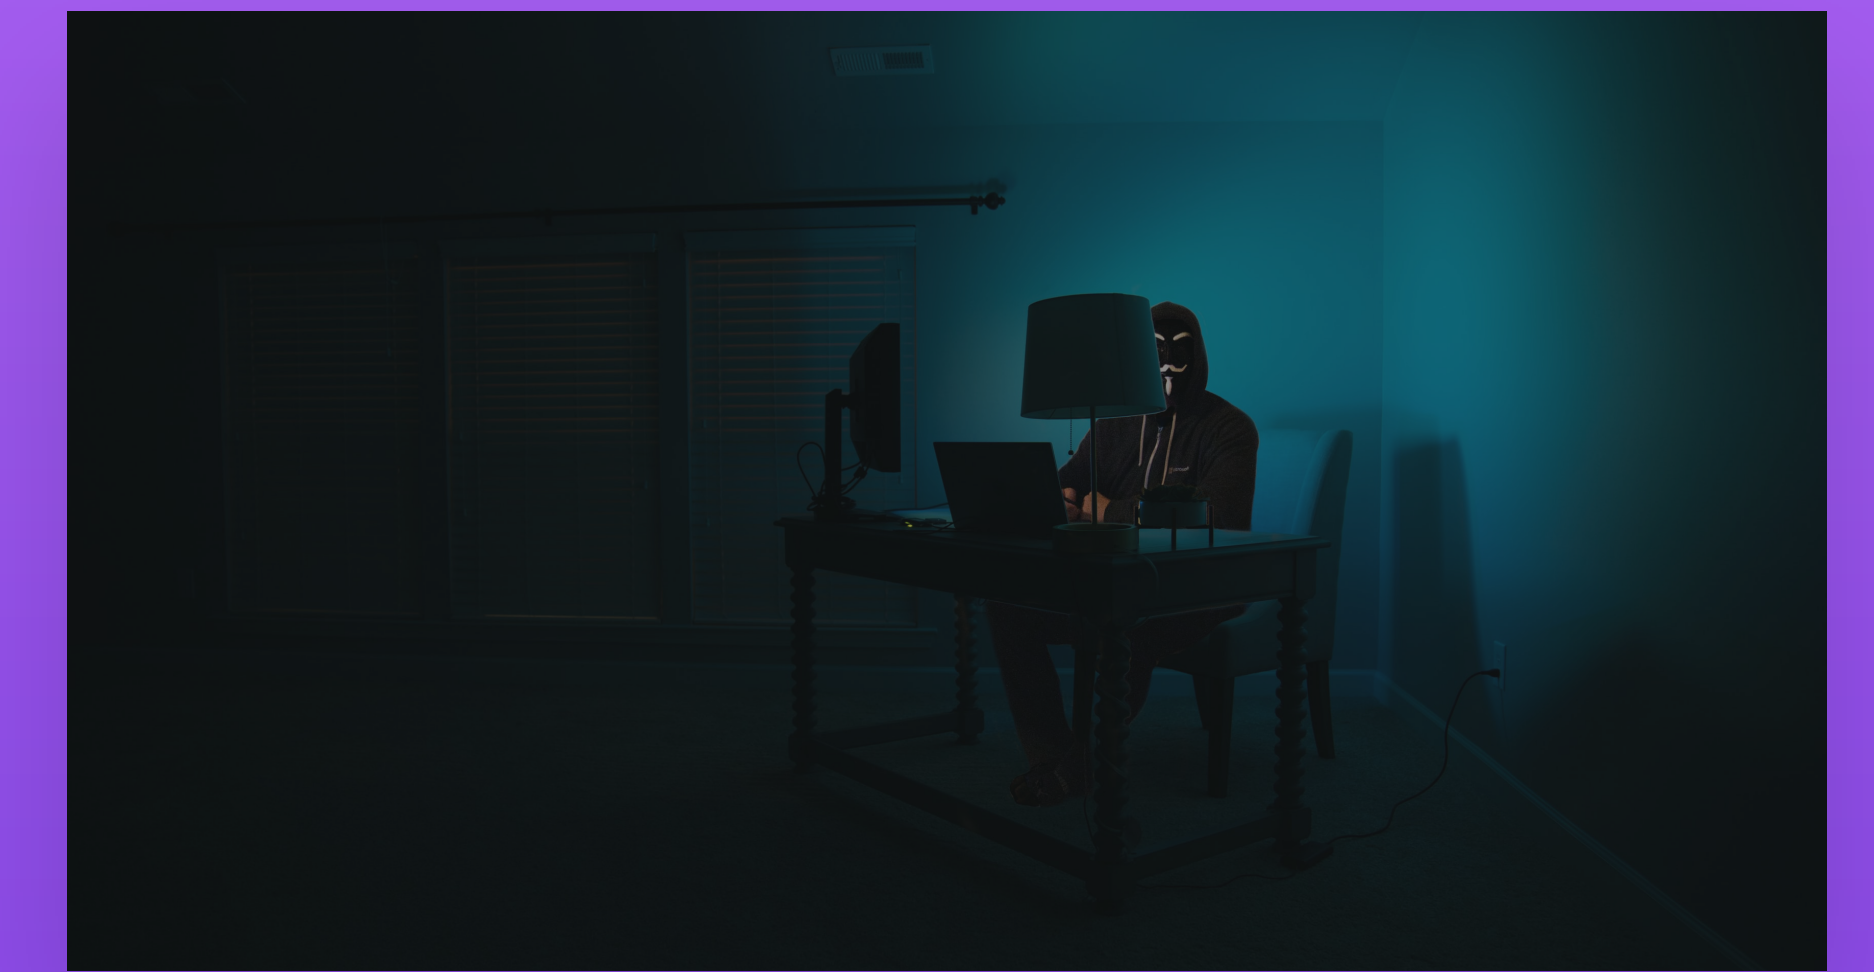

1. Privacy monitoring is an issue we face every day

2. TCP/IP security vulnerabilities and low efficiency

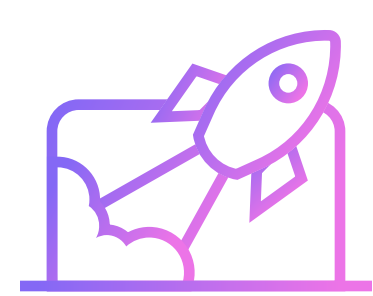

3. The Internet is full of restrictions and filters

4. Trust issues with centralized VPN providers

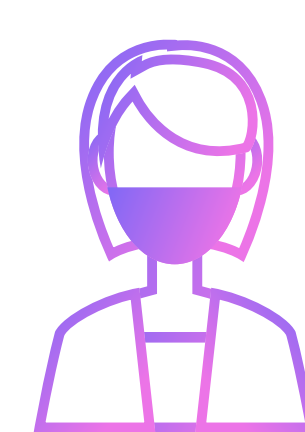

Benefits of Tachyon Protocol

A Decentralized Internet Protocol with Greater Privacy Protection, Security & Freedom

200% faster in complex network conditions

90% connection rate on weak network
95% stability of the network
200%~1000% faster than TCP/IP

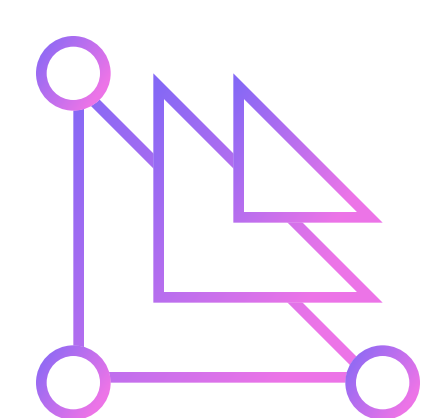

Stay fully private

Multi-path routing for single-point attack
Multi-relay forwarding for MITM attack
Token for both trading and value

Advanced security for data protection

ECDHE-ECDSA asymmetric encryption
Protocol simulation to protect data
Add random data to disorganize data

Driven by DAO with stronger vitality

P2P network without central node
Everyone can participate in network construction and community governance
Clear incentives to ensure the vitality of the network

Unblock streaming & social networking

9 tunnels to help you bypass filters and firewalls
Unblock streaming & social networking anywhere
Gain access to Facebook, Netflix, Spotify and other platforms

Easy setup

Standard API to easy integration with all blockchain
Supports all popular languages & systems
Highly customizable modules

IPX Token

The Next Generation TCP/IP Internet Protocol is Driven by IPX Token

Tachyon Protocol will introduce IPX Token as the native crypto-currency of the network. The initial supply of the IPX token is 1,000,000,000 (one billion). As token hosted by the V SYSTEMS blockchain, IPX token serves a clear purpose and utility in the overall Tachyon ecosystem.

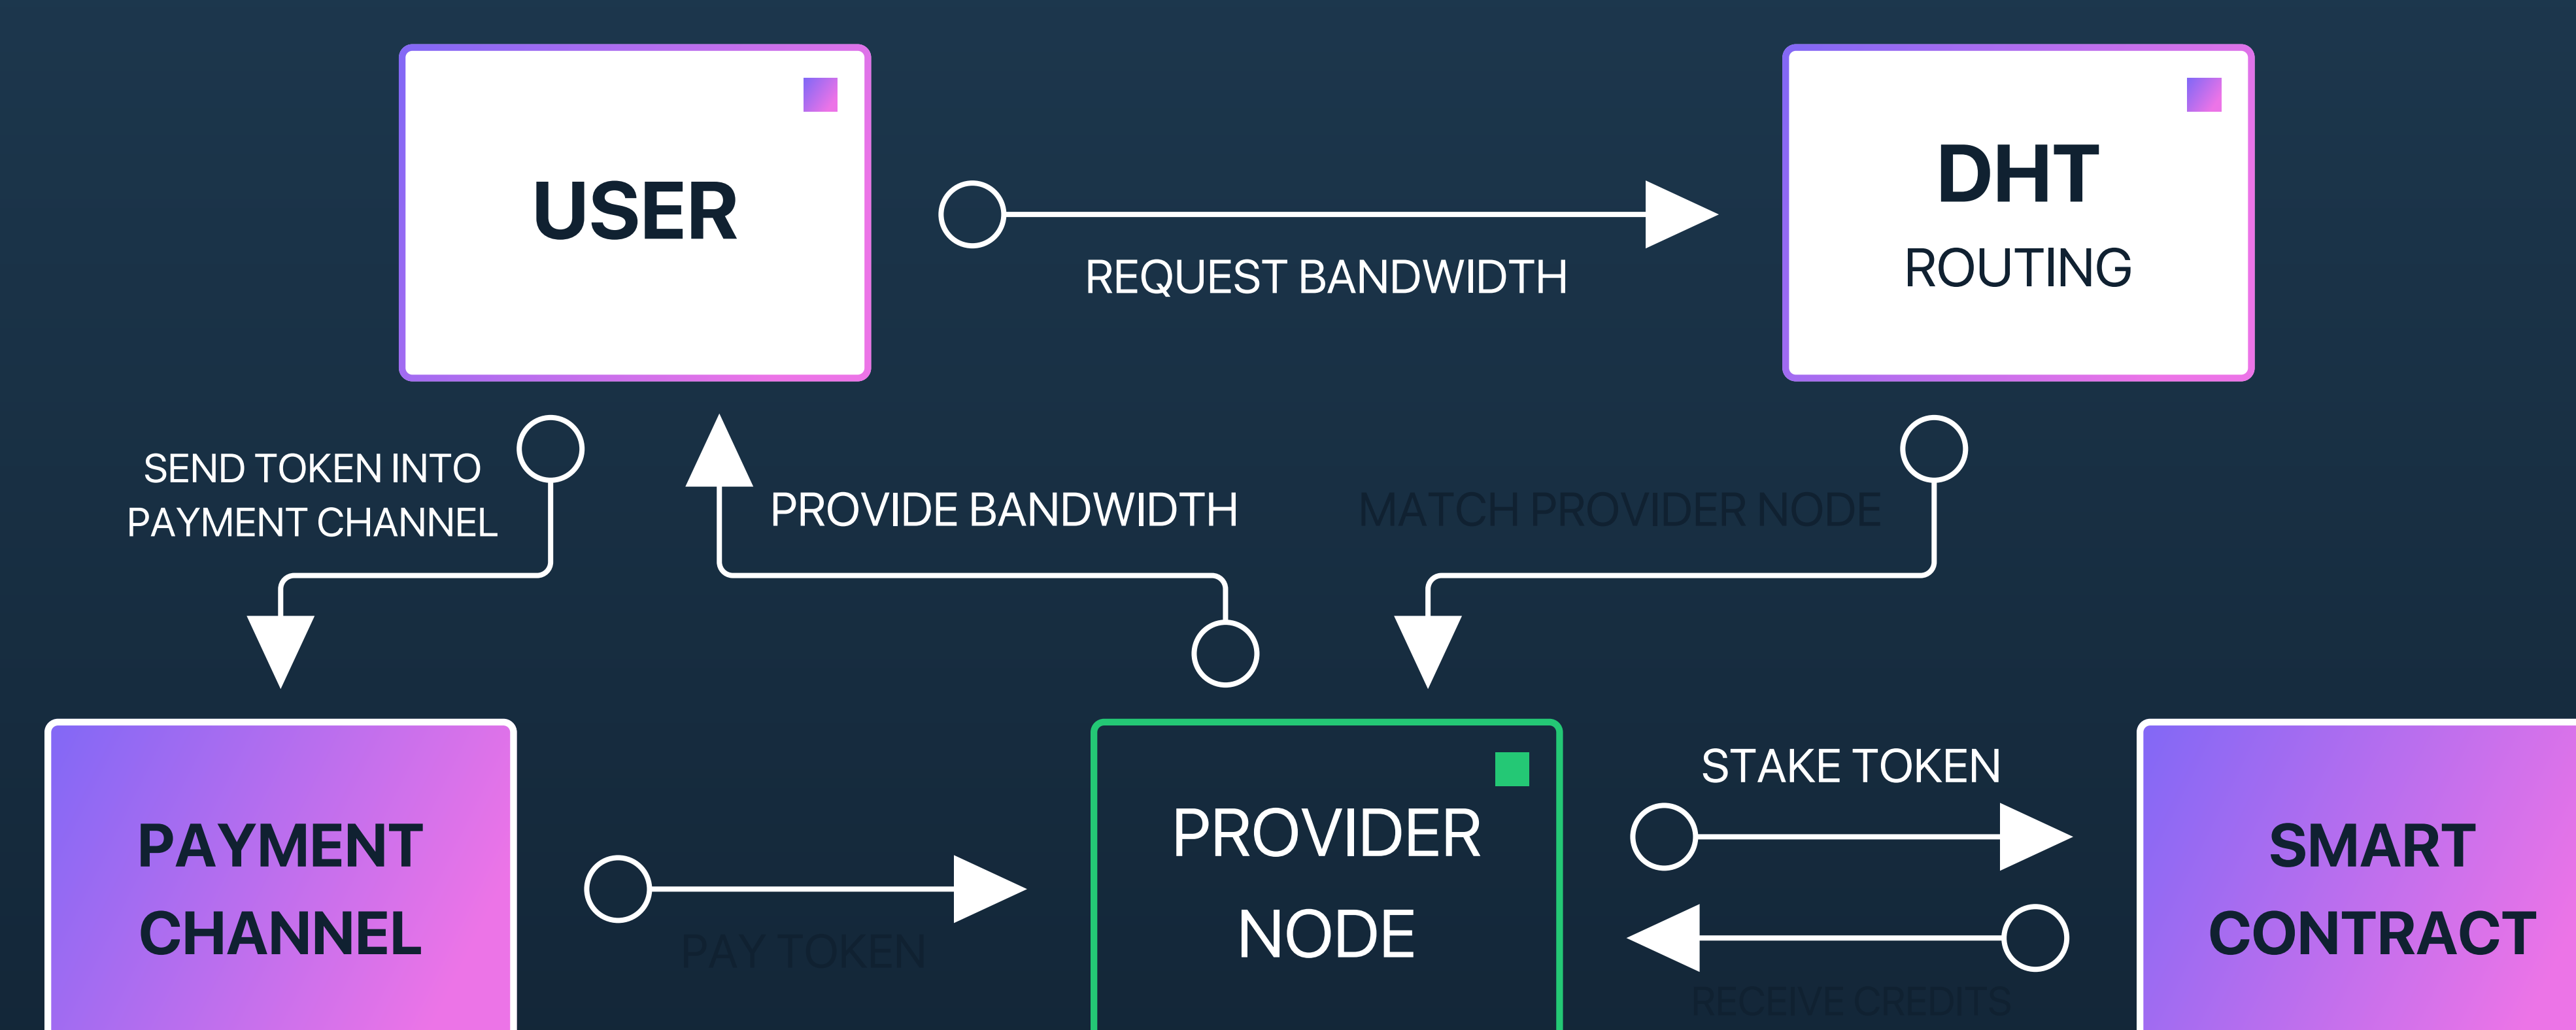

Use cases

Identity verification

Make the protocols driven by DAO

Trading and store of value

Incentive & cooperative mechanism

Why users prefer IPX token?

1. Users can use the DApps in Tachyon ecosystems to enjoy safer & faster Internet services.

2. Users who hold the IPX Token can enjoy the excess revenue as a provider node.

3. With the settlement of more business scenarios and the participation of more nodes, IPX Token will have a wider range of uses.

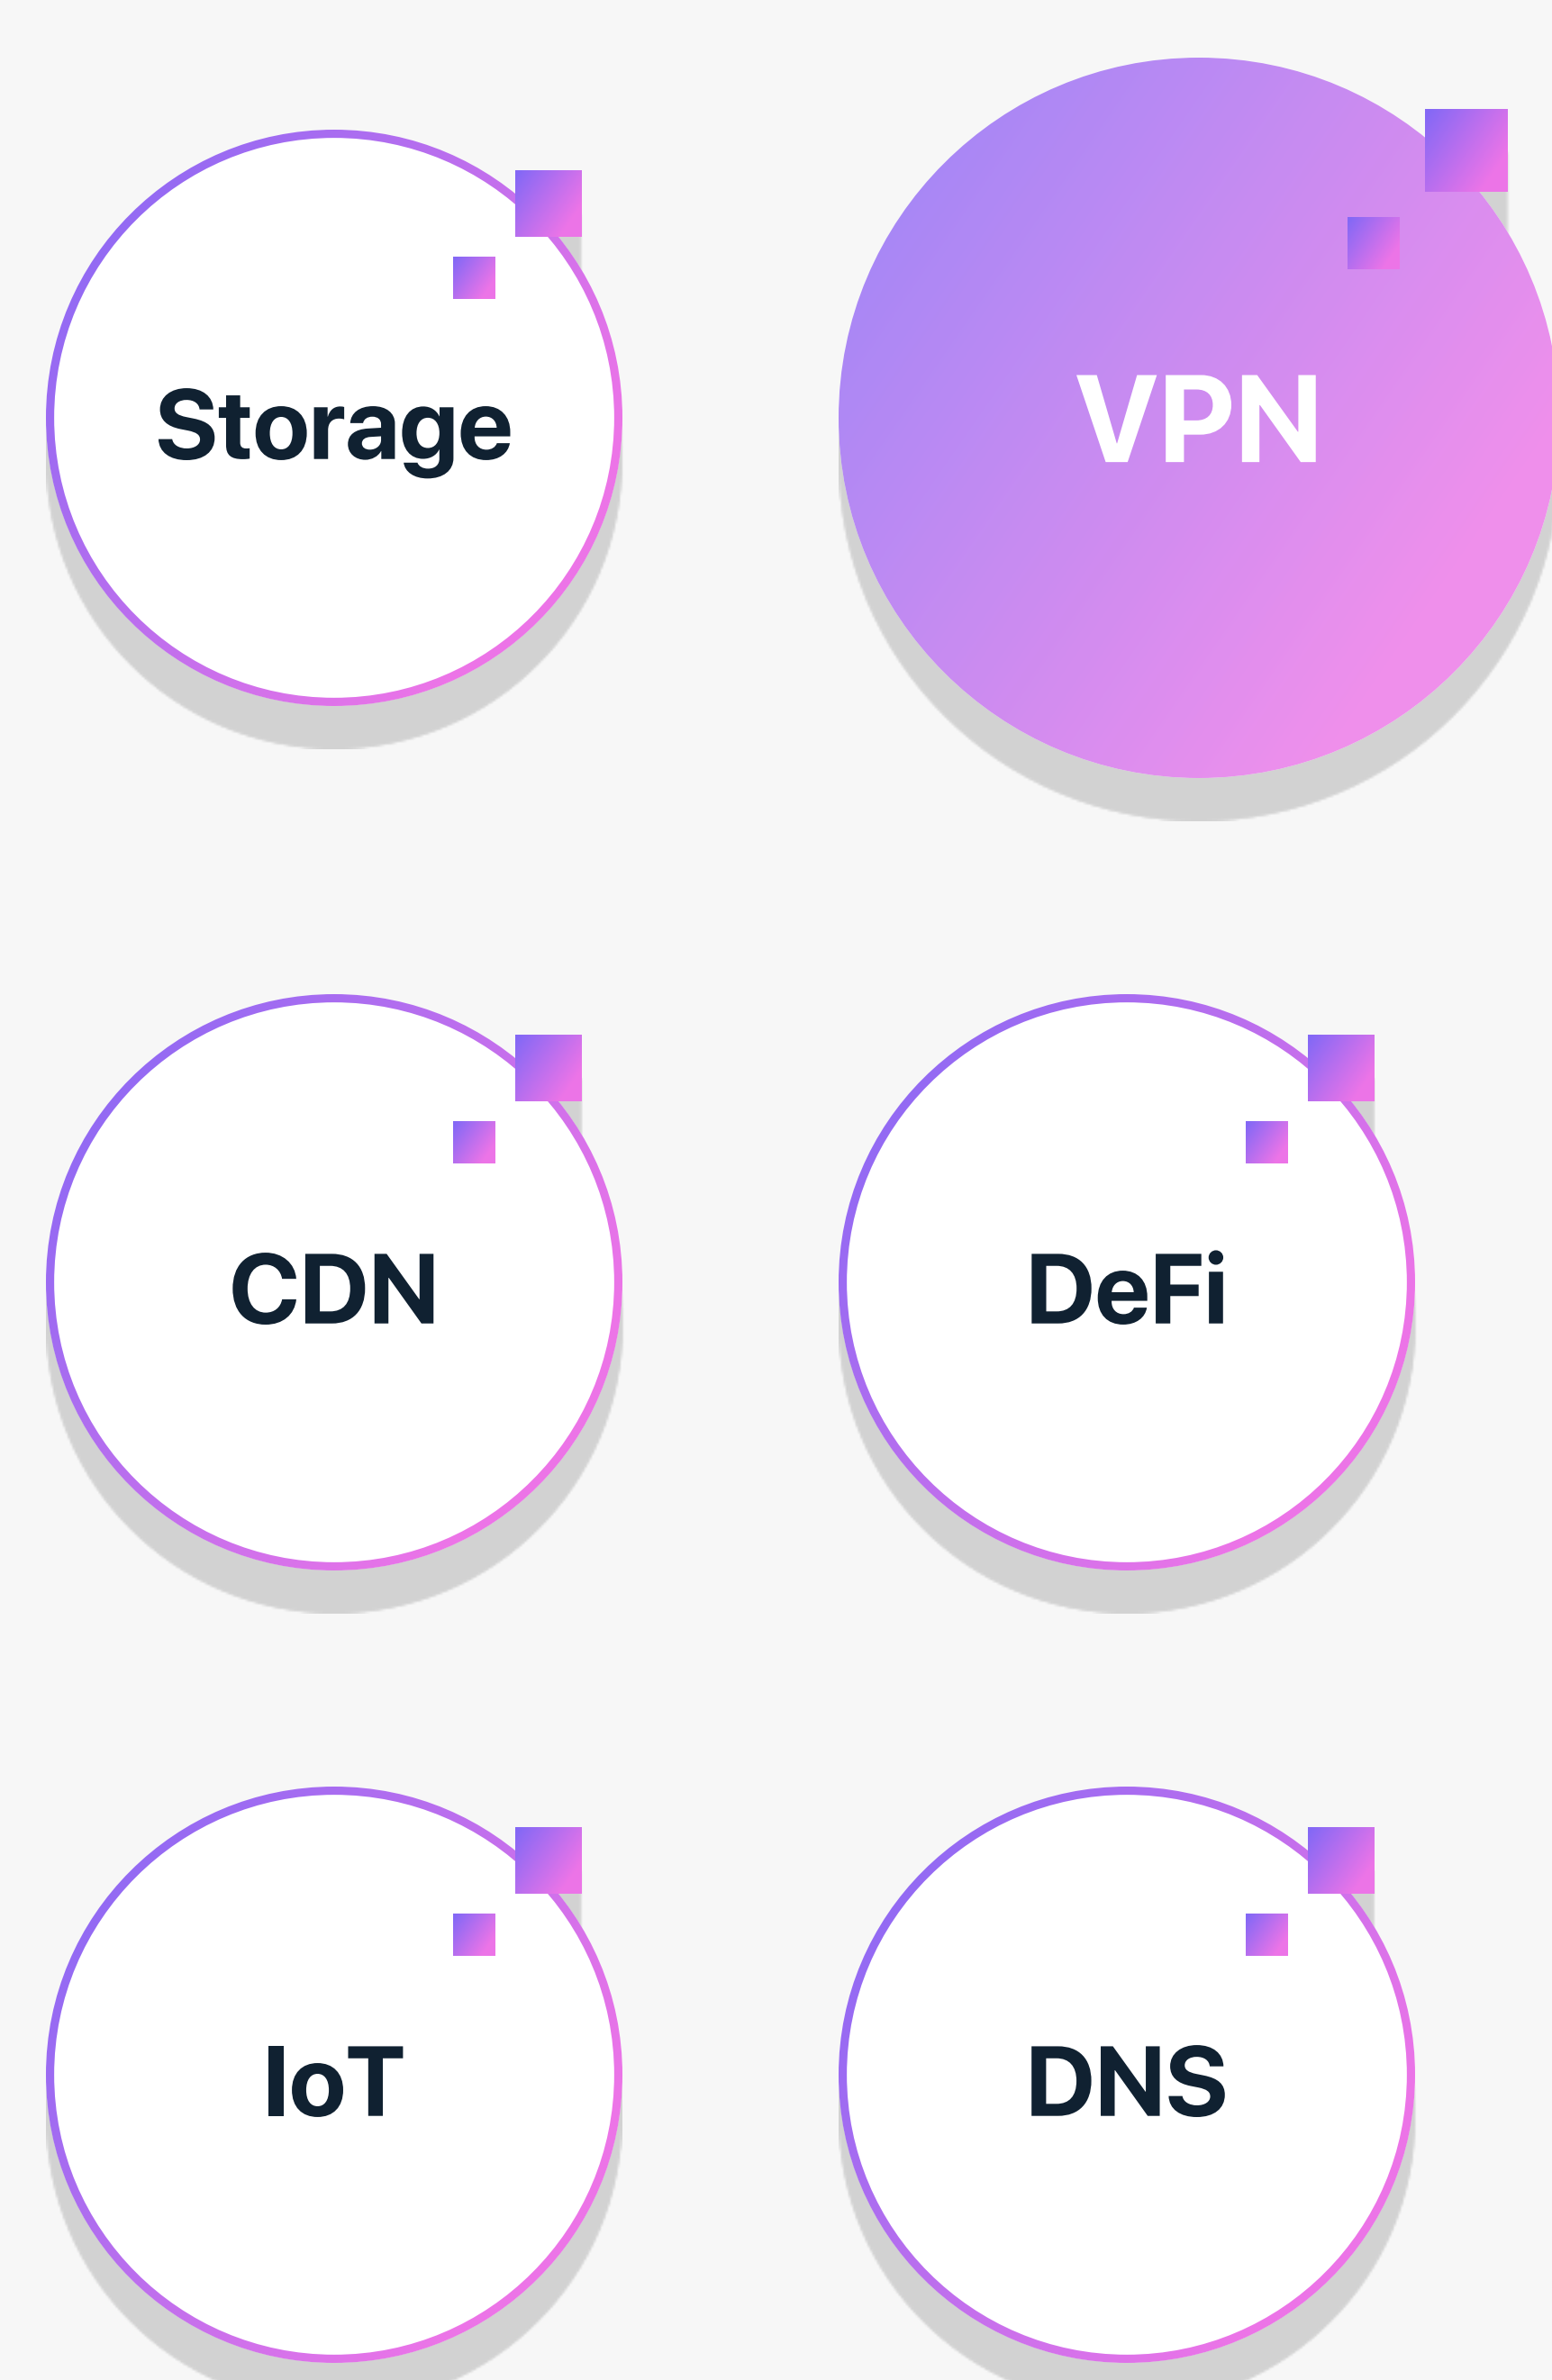

Why provider nodes prefer IPX token?

1. Get **5%+ staking fees** per year.

2. Get **20% session fees** per year (providing 5TB traffic). The more you work, the more you earn.

3. Participate in community governance and determine the direction of network development.

Tachyon Protocol Use Cases

Tachyon VPN

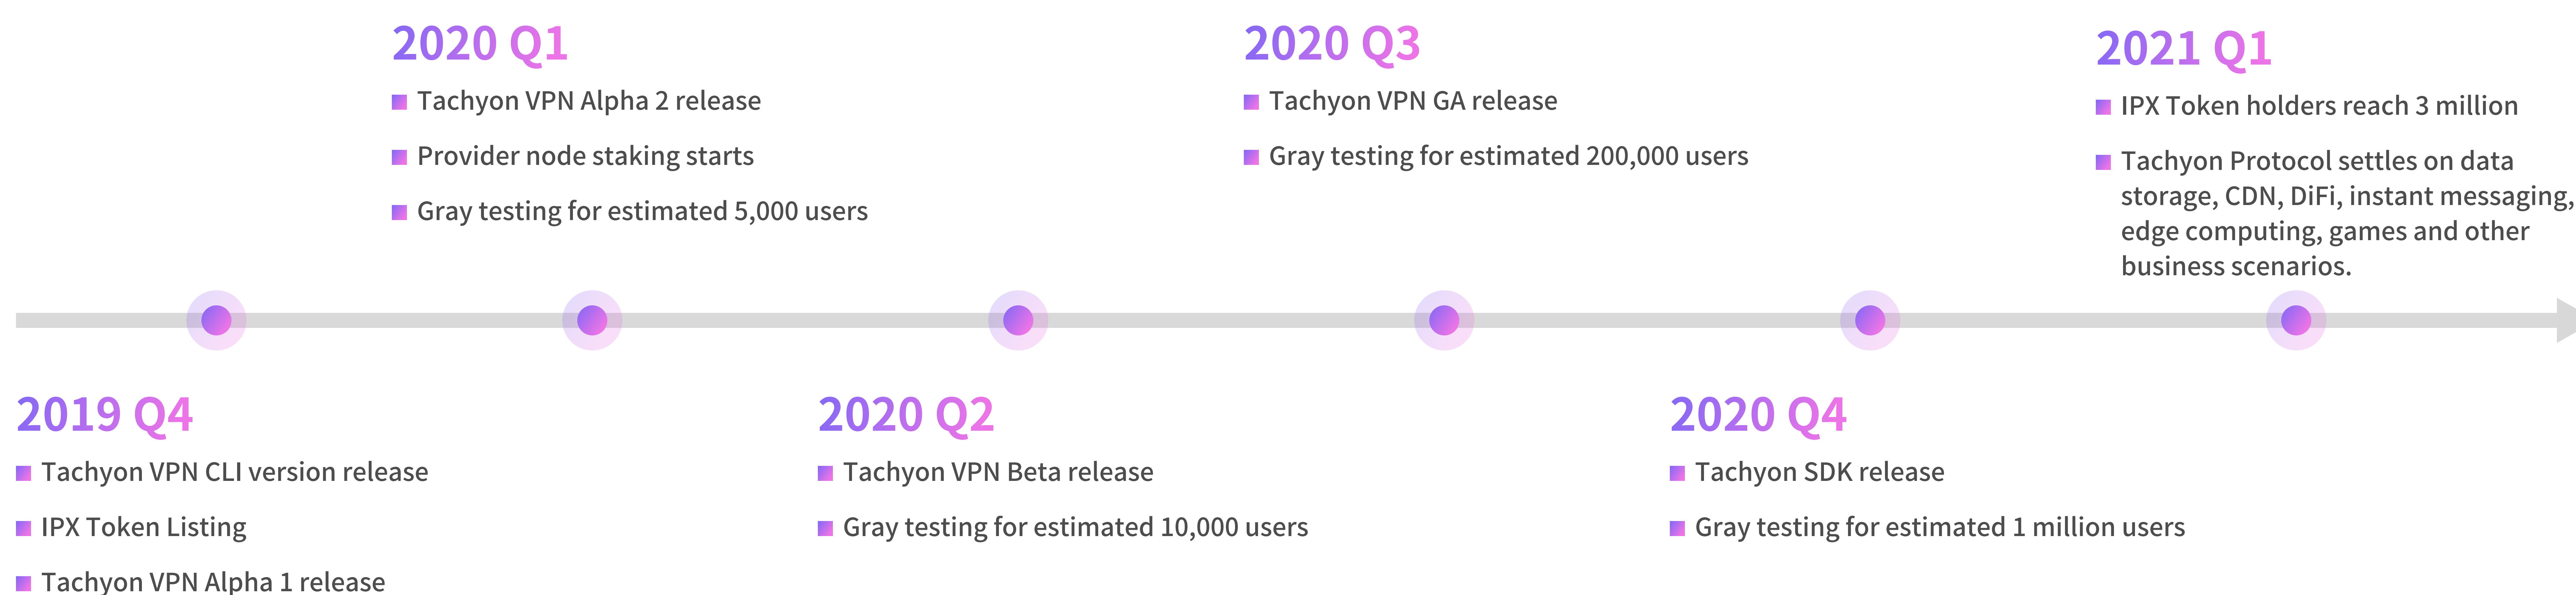

—The First DApp based on Tachyon Protocol

- Faster
- Greater Privacy Protection
- Higher Security
- More Freedom

Tachyon VPN Advantages

	Tachyon VPN	Centralized VPN
Network Architecture	P2P	C/S
Transaction	Token	Credit card/Paypal
The cost	Low	High
Protocols	Open+Self-developed	Open
Servers	★★★★★	★★★☆☆
Unblock	★★★★★	★★★☆☆
Security	★★★★★	★★☆☆*
Speed	★★★★★	★★★★★
Anonymous	★★★★★	★

Roadmap

Team

Sunny King
- Founding Member

Inventor of Proof of Stake consensus mechanism.

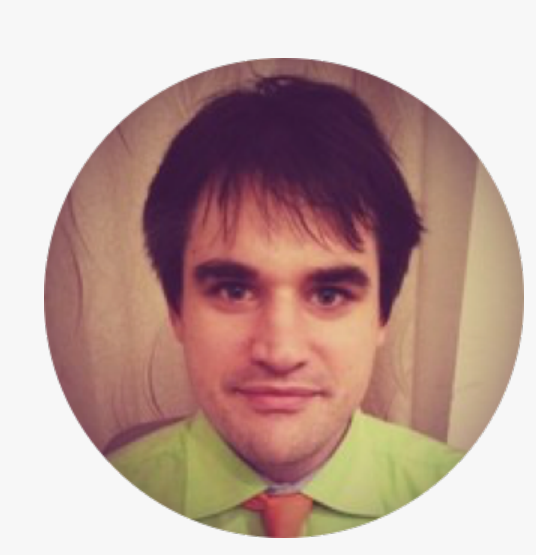

Alex Yang
- Founding Member

CEO of V SYSTEMS, a FinTech entrepreneur and investor with over 14 years of experience in banking and finance.

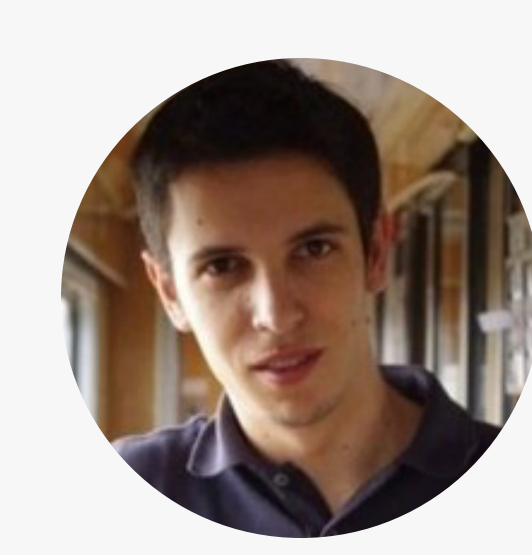

Peerchemist
- Founding Member

Peercoin's project leader, is a well-known OG crypto developer.

Jacob Gadikian
- Founding Member

A technologist obsessed with the potential of decentralized systems.

Vinko Karamatic
- Advisor

Technology expert with over 13 years worldwide experience in STEM, last three as a CEO.

Powered by V SYSTEMS and X-VPN

Both V SYSTEMS and X-VPN have a development team made up of top-notch database scientists and engineers, who can provide technical support and overall strategic planning for Tachyon's development with their extensive experience and knowledge in VPN, internet and applications development. The VSYS and X-VPN teams will also share their rich resources in marketing and community with Tachyon to facilitate its promotion and community growth.
